## **ANNUAL PERFORMANCE REVIEW 2021-22**

We shared our trading call performance last year this time and would be glad to do so again now. I am happy to announce that we have exceeded our previous year's annual performance. As mentioned previously, it is important to reflect upon the year that went by, which helps in eliminating repeated mistakes, and explore the best way to approach the commodity markets.

As illustrated earlier, 98% of our calls are positional in nature which was carried for anywhere from 2 days to 10 days or even longer in some instances. A weekly report on the performance of the calls is also provided and we encourage you to keep following it.

I am very happy and delighted to announce that our calls have given a net % return of 71 % approximately, excluding taxes and other costs for the whole year, a minor fall compared to the previous year. The year gone was extremely volatile year and margins doubling in many cases. Comparing this performance with the benchmarks like the Bloomberg Commodity index and Reuters index, we have beaten them and hope to do much better in the coming year.

As illustrated before, all our calls are trade able calls and since it is positional in nature, the chances of slippage are minimal, though it cannot be avoided fully.

## Call Performance for the period Nov 2021 till Oct 2022

Month	P&L	Cap 25 Lac	2500000
Nov-21	260000	Nov-20	2760000
Dec-21	179550	Dec-20	2939550
Jan-22	-72850	Jan-21	2866700
Feb-22	-70450	Feb-21	2796250
Mar-22	-109525	Mar-21	2686725
Apr-22	281750	Apr-21	2968475
May-22	439350	May-21	3407825
Jun-22	-42275	Jun-21	3365550
Jul-22	-41540	Jul-21	3324010
Aug-22	391100	Aug-21	3715110
Sep-22	260075	Sep-21	3975185
Oct-22	279150	Oct-21	4254335
		ROI	70.17

No of Calls	272
Profit Calls	189
Loss Calls	83
Strike Rate (%)	69.50%

- As seen in the table above, we have used 2 lots for initiation purposes. But there are only 30-35% times that the second lot has been traded. Mostly the first initiation level will be when the call is given and the next one on dips to certain support level. There is a part profit that is taken (part t/p). Once, the first take profit level is achieved, we immediately move the stop loss to cost or in between cost and stop loss depending on the prevailing view, thus ensuring we do not lose on a call that we have booked part profit earlier. This is a prudent risk management strategy one should adhere, to protect the profits and minimize the losses.
- Also, please use the same leverage for all our calls, do not try to increase the leverage if you see a good winning streak. Another important thing to note, is that our success % ratio though has gone below in couple of months, we have been judicious and ruthless in risk management and position sizing which is done objectively. These are the two important factors investors should work on more than accumulating knowledge on the markets.

Margin employe	2500000
Net profit	4254335
% Return	70.17%

As seen in the above table on margins, the margin for individual commodities and the total margin employed for 2 lots of Rs. 25,00,000 has been used as a base capital for calculating profits. We send the weekly call performance to all our clients which elaborates on the call that was given and its conclusion.

#### **MONTHWISE PROFIT/LOSS FROM NOVEMBER 2021 TO OCTOBER 2022**

As always, we urge you not to be selective on our calls and act on all of them religiously, as soon as it is received, as the commodity markets do not give much time for investors to respond. Due to our prudent risk management strategies, we have been able to deliver good returns and we hope you follow the same by adhering to our stop loss levels and target levels strictly.

We hope you have had a fruitful trading experience so far and please do write to me on [gnansekar.t@commtrendz.com](mailto:gnansekar.t@commtrendz.com), and I will be pleased to assist you in any way possible.

Happy trading!

**Warm Regards,**
